

## **Creating with iPhoto**

Events: organises photos automatically into groups.

Photos: All of your photos in one 'library.'

Faces: Name someone whose face appears in iPhoto - iPhoto finds all the photos containing that person.

Places: Sorts photos according to the place they were taken - marks location on a map.

DON'T FORGET iPhoto help or [www.apple.com/au/findouthow](http://www.apple.com/au/findouthow)

### **Make an album**

Creating albums according to interest/like groups.

You could use it for: - a temporary collection area e.g. thinking about printing certain photos OR creating a slideshow OR creating a project e.g. a book.

You get to see all photos being considered in one place.

You can add and rearrange photos in any order.

The original photos stay in your events.

Use photos in as many other albums/projects as you like.

### **Make a slideshow**

Select the photos in Events or Library first. There are two kinds of slideshow you can make:

Instant Slideshow - if you quickly want to show a group of photos. If you show the same selections again, the same settings apply. You won't be able to change photos or customise them any further.

Saved Slideshow - This is the same but you save it and therefore can make continually changes.

### **Create a Photo Book**

Select the photos in Events or Library first.

Choose your theme.

Autflow the photos OR put them into the placeholders where you want them to be.

You can add extra pages, change the layout/background of each page individually if you wish.

You can also add text if you wish.

### **Create a Card**

Select the photos in Events or Library first.

Choose your theme.

Autflow the photos OR put them into the placeholders where you want them to be.

You can add extra - change the layout/background of each page individually if you wish.

You can also add text if you wish.

### **Create a Calendar**

Select the photos in Events or Library first.

Choose your theme.

Autflow the photos OR put them into the placeholders where you want them to be.

You can add extra months, change the layout/background of each page individually if you wish.

You can also add text if you wish.
